San Francisco, California

Dear Marvin:

Thanks for your letter of April 23. The list of Antwerp species prepared by Dr. Gijzen is most interesting and, as you say, must have been a lot of work. It is not surprising to find they have had almost everything in the course of time, as most of the big European zoos have--even Equus quagga! I have sent the list to Moira Kelham, as you request.

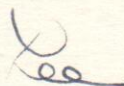

I note the Tapirs in the San Francisco list. I finally got Carey Baldwin on the telephone. He says his young Tapir was from a female Baird by a male South American. The third animal is a similar hybrid, bred the year before. This seems to be as far as we can get with this.

I will call Pan paniscus to Joe Davis's attention again, though where he would put one if he had it I don't know. I will also report the safe arrival of the Conservation films.

I enclose a copy of the December 31, 1959 Mammal Census and will get off a bird list in some way.

Best regards, as ever

Sincerely yours,

Lee S. Crandall
General Curator Emeritus
