Dear Darwin -

Many thanks for the 2nd section of the Primates, which I now have hooked together. Also for the notes re Uakaris - very good and very interesting.

I know Mr Reynolds, who has been here several times. It is remarkable that he could have devoted so much time to hunting out all this material, which certainly would be of limited interest. A pity that the taxonomy of R. sumatrensis caused him so much trouble. The two races, R. sumatrensis and S. lasiotis are currently recognized, so that there is really no problem. Joe

Davis - attending the
mammalogist's meeting
at Urbana this week, so I
think I shouldnt hold the
Rhino piece.

Best regards

Ree

P. S. Maxen Perkins had a
Red Howler in 1955 which
he had had over 4 yrs.
Have it checked since but if
verified - could be very good
