Dear Darwin -

Thanks for your letter of the 23rd with enclosures - all very interesting. A pity you couldn't get a list from Brookfield as it would have added much but anyway, very useful.

The Abyssinian Turret seems to be notched which is described as tawny above, white below. Perhaps this is Roth's specimen.

The Tee-Tan's have just returned and report London very interested in red light. It would work for them, of course, if sectioned off. John was not impressed with George Satterhead's nocturnals.

Cully's logeities would be very good if verifiable. Best regards  
Lee
