Dear Harven -

Thanks for your informative letter of 2 Dec. No, our Mountain Howlers appear to have made no breeding progress. The ♂ was five animal - so is Sumaili, for that matter. The ♂ was last weighed 1/3/67 and was checked at 414 lbs.

Wayne King says he is checking on source of Komodo monitors being exported and expects word soon.

Nothing special here at the moment, except Mercury Yves!

Best regards Dec
